05 - DIAMOND COATED SEED SCARIFYING PLATE

SIZE:	Special sizes may be coated as well as manufactured. Prices upon application.
APPLICATION:	Clover and Lucern seeds and where husking is required.
FIELD TEST RESULTS:	One diamond-coated plate processed 127 tonnes of Lucern without evident wear of the plate. After two years, the plate still gives 100% non-stop performance during the busy seeds cleaning season. Diamond coated scarifying plates eliminate costly shut downs relating to recovering existing plates with emery or garnet paper. De-husking – special diamond coated plates available for de-husking a variety of products.
